

PREPARED FOR DEE FITNESS

Hi Dee —

Your **dee-fitness.com** already does the hard part: it tells your story, shows your work, and brings clients in. What it doesn't do — what no marketing site can do alone — is run the day-to-day business behind it. That's where Trainer Pro comes in.

We're a complete operating system for solo trainers and small studios: scheduling, payments, workout plans, progress tracking, an automatic client portal, and a polished public profile that picks up where your existing site leaves off. **Your domain stays. Your brand stays. Your clients stay.** The mess underneath all of it goes away.

01

Booking that actually books

A client clicks "Book" on dee-fitness.com and 90 seconds later you have a paid session on your calendar — slot picker, intake form, and Stripe checkout in one

03

Workout plans + a real client portal

Build programs from a 50-exercise library, assign to clients, log results live during sessions. Clients log in to see their schedule, balance, and progress.

02

Every session, every payment, one place

Drag-and-drop calendar, recurring sessions, package balance auto-decrement, payment history per client.

04

No spreadsheet, no DMs.

Studio mode for when you grow

Add a second trainer in a click. They get their own clients, you see the whole business. Built in, no extra tier.

The operating system for personal trainers

15 minutes on Zoom. I'll show you the demo. If you don't see something you'd use, no hard feelings.

WHAT CHANGES

Your site, before and after

dee-fitness.com today is a static brochure: visitors learn about you, then leave to book another way. With Trainer Pro behind it, the same domain becomes a full self-serve experience — discovery, booking, intake, payment, training, and follow-up — without breaking the look you've built.

	dee-fitness.com today	+ Trainer Pro
Booking a session	Email or DM	Slot picker + intake + payment in one flow
New client onboarding	Manual back-and-forth	Auto-sent intake link with PAR-Q + e-signature
Payments	Cash, e-Transfer, Venmo	Stripe Checkout + auto-recorded payments + package balance
Workout plans	Google Docs / paper	Drag-drop builder, 50+ exercises, in-session logger
Progress tracking	Memory + photos on phone	Charts per metric, before/after photos, PRs
Client schedule access	Ask Dee	Branded portal — login, see upcoming, request reschedule
Bringing on staff	Build a new system	Studio mode, on by default — each trainer their own clients

FEATURE SET

Everything that's included

Public profile site

Progress + photos

Line charts per metric, before/after gallery

Stripe webhooks

Refund handling, idempotent payment recording

Studio mode

Multi-trainer with owner overview

Reminders (in progress)

SMS via Twilio, email via Resend

THE DEMO

Here's what a 15-minute walkthrough covers

1 Your public profile

We open your branded /p/dee-fitness page — hero, about, services, gallery, testimonials. Your colors, your photos. (Or: your existing dee-fitness.com keeps running and we just plug in behind.)

2 A real client books

From the public site, click “Book a session.” Slot picker shows your real availability. Select Tuesday 9 AM, 60 min, fill the intake form, sign the waiver. Done in 90 seconds.

3 Stripe takes the money

Same flow shows the package options. They pick a 10-pack, click pay, enter card. Your back-office dashboard now shows the new payment + package balance bumped by 10.

4 You build a workout

Open the new client's page. Click “Assign workout.” Pick exercises from the library (or build custom). Save. They can see it in their portal.

5 Live session

On Tuesday morning the session is on the calendar. You open it, click “Log workout,” punch in actual reps and weight as you train. Saved.

6 Progress + portal

Months in, you've logged her weight, body fat, PRs. Charts auto-build in the Progress tab. She can see her own data anytime.

WHAT IT COSTS

\$30 /
month

Includes everything on this page. No long-term contract. Pause or cancel any time. Stripe processing fees pass through at standard rates (2.9% + 30¢). Studio mode — same price up to 3 trainers.

NEXT STEP

15 minutes. Live demo. Your domain, your branding.

Pick a time and I'll come to your screen. If you don't walk away thinking "this would save me 5 hours a week," we go separate ways. Either way you'll have seen what's possible.

Reply to this email, or text me directly. I'll send a demo URL same day.
